Design Approach

At the very heart of the Phase One replacement of West Albany High School is the intention of creating dynamic, relevant learning environments that will support all students now and long into the future.

Our following Guiding Principles are central to the design and drive our decision making, the rubric to which we measure the success.

- Support the continuation of the Bulldog culture, “Once a Bulldog, Always a Bulldog” by developing a school that promotes community, pride and inspiration.
- Provide applied learning environments that engage today’s learners and enable their future post-high school success to excel in an ever-evolving work force culture.
- Create a highly efficient, cohesive learning environment that brings together the existing school building and the new facility as a seamless whole.
- Continue to develop a sense of community amongst the students and staff by providing gathering spaces that promote informal learning opportunities and building relationships.
- Create flexible spaces that can transform and adapt to new learning methodologies and evolving academic programs.
- Provide needed spaces for the functionality of the school and accommodate a student body of 1,600 learners, as well as a facility that is durable and of long-lasting quality.
- Develop a school that can be an amenity to all GAPS schools and can be used by the larger Albany community--a source of pride for all.

So how are we proposing to do this?

- Applied learning program (CTE) spaces are designed to support the curriculum that has been developed to respond to student interests. Large lab spaces are designed to be flexible and transformative to adapt to the changing job market. Fabrication labs will support not only specialized learning classes but also accessible to core curriculum classes for integrated project-based learning.
- The Commons is designed not only to provide needed dining space but become a central gathering space where students want to be. This space will also work well for informal learning and community use after-hours.
- The new facility will be connected to the existing building, with careful attention given to the smooth flow of students from one to the other but direct connections to the existing gym, interior corridor through F Hall and exterior, covered walkway along west side of the gym.
- The Auditorium is located to be a central learning lab as well as performance venue to be used by other schools and the larger Albany community. Connected to band, choir, drama, audio recording, broadcasting studios and scene shop, the auditorium becomes the anchor for multiple, integrated CTE programs. By its location on the site, it is easily accessed by other schools during the day or the community for after-hours performances.
- Business labs and Fine Arts CTE studios are also woven into the auditorium spaces, thus supporting the inter-related educational curriculum and enhancing post-high school opportunities.
- Close coordination with the District’s technical standards regarding building materials and systems allows us to provide a highly durable and more easily maintainable facility.
- This cluster of specialized educational spaces provides needed learning environments that the current school building does not have. The addition is master planned for seamless future expansion and student population growth. Two core curriculum academic wings are designed to extend the learning environments to the east of the building to conclude the creation of a new West Albany High School.

**Collaborative Spaces:
Shared Resources**

**Transparency:
CTE opening onto Commons**

Site Analysis

Analysis of the Project Site:

The project site is located in a single family residential area, with the exception to the west, where an institutional office use exists. Hwy 99 is near by at the east.

Site access is predominately by vehicle from both N/S roads bordering the site, as well as Queens Boulevard in the E/W direction on the Northern end of the site.

The current site is a contiguous block containing Memorial Middle School (MMS) and Liberty Elementary to the South. No secondary vehicular paths exist through the site, which includes extensive athletic fields and a stadium.

Traffic comes from the east side and from the south around to the west side to enter parking. In order to minimize the traffic impact, the design intent is to move students away from driving near the elementary school and allow them to park on the east side. This is achieved by utilizing the existing lot and providing an enhanced parking and parent drop off access to the east side of the site.

Bus and visitor parking would remain on the west.

Existing Site Areas

Site Area.....	46.5 Acres
Athletic Fields	10.8 Acres
Available Buildable Area	31.2 Acres (within setbacks)

Site Considerations:

1. Underutilized Parking Lot
2. Improve Pedestrian Connection
3. Existing Bus Route
4. Staff Parking
5. Athletic Fields to Remain
6. Fields to be Relocated
7. New Entry
8. Relocated Visitor Parking near New Entry

Parking Considerations:

Existing On Site Parking

Visitor	4
Student	255
Staff	100
East Lot	62
Total	421

Requested Parking (Phase I)

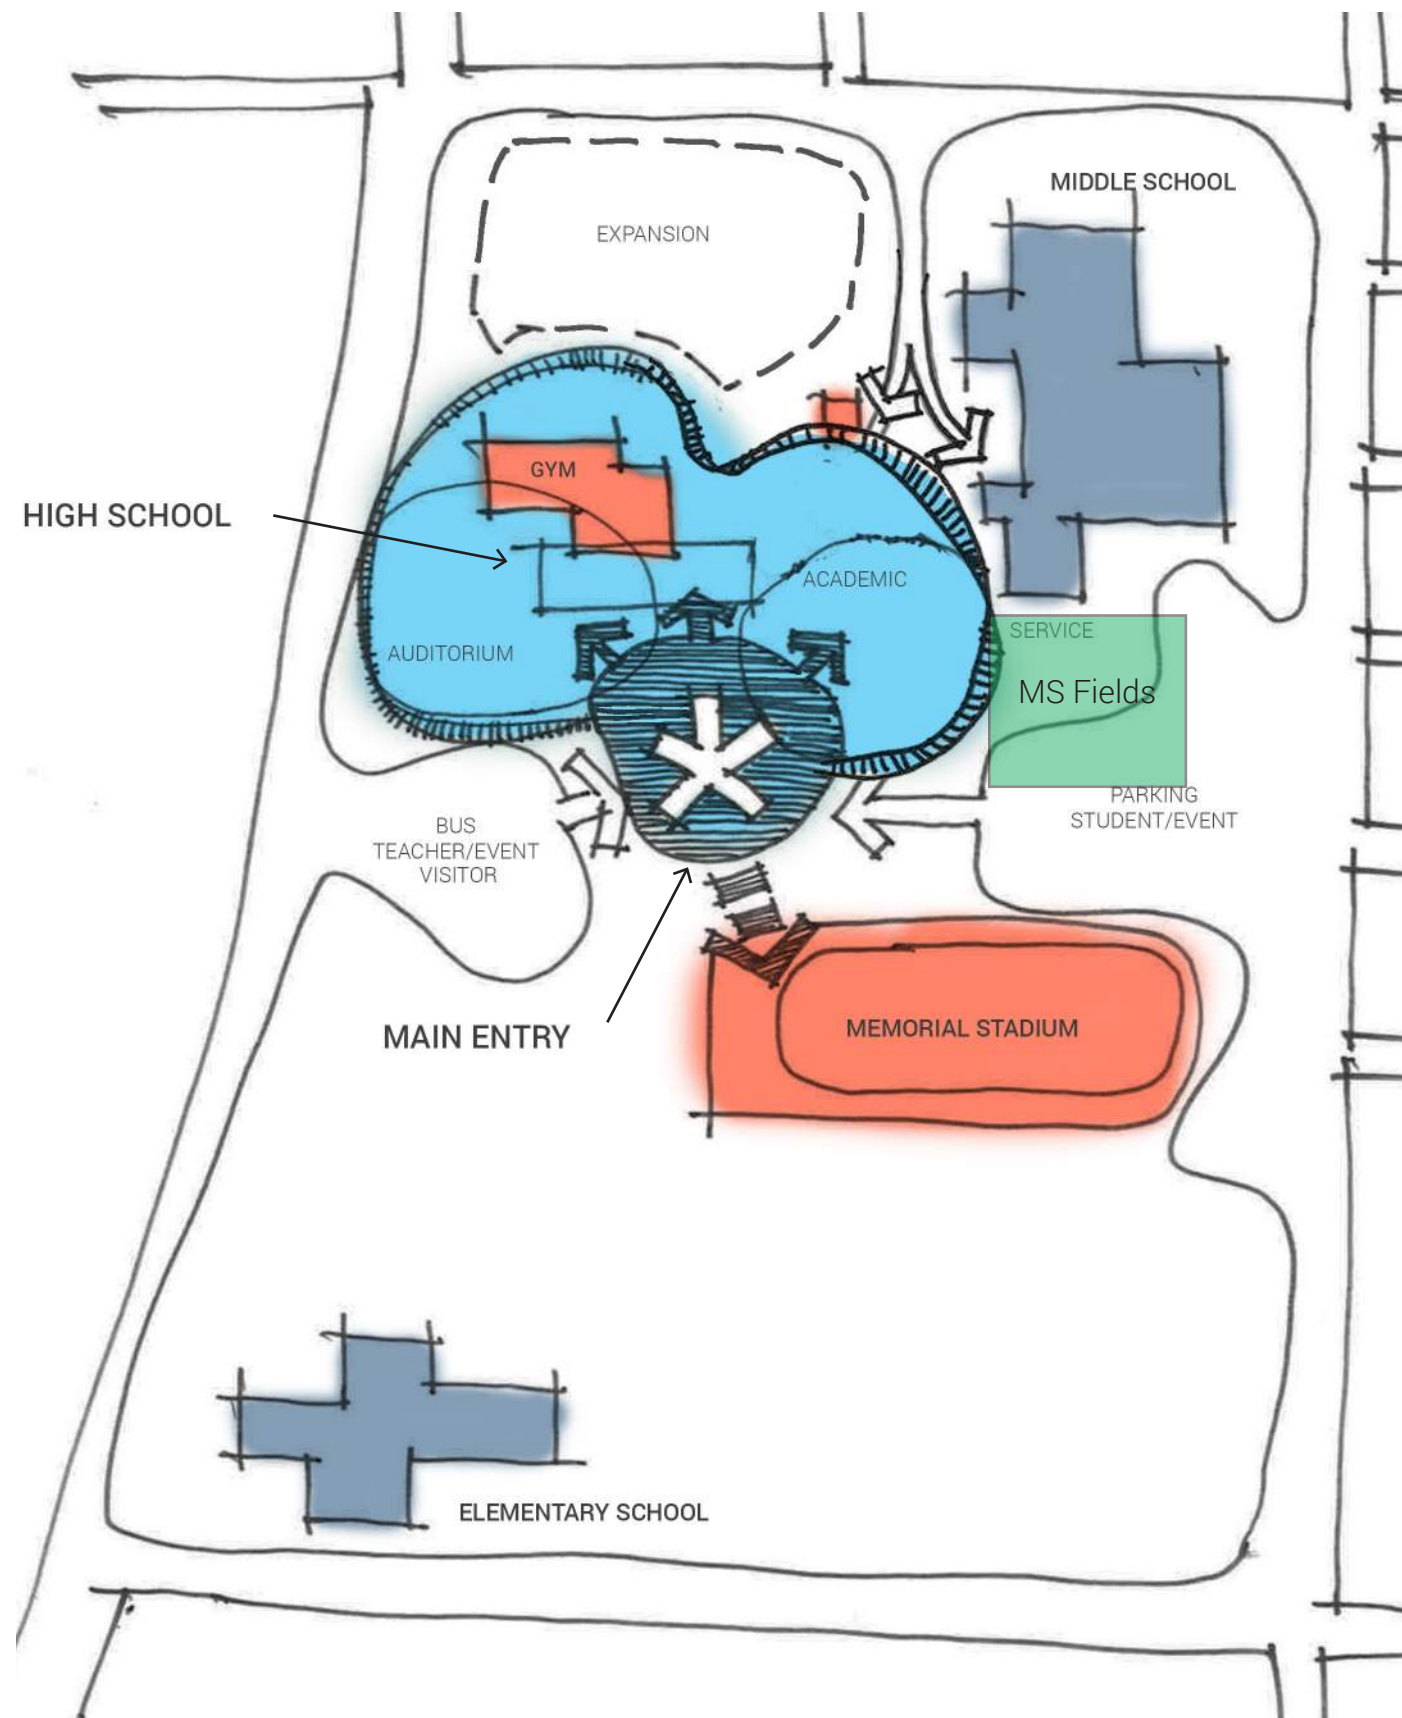

Visitor	20
Student (50% juniors & seniors)	338
Staff	120
Total	478

Requested Parking (Phase II)

Visitor	30
Student (50% Juniors & Seniors)	400
Staff	120
Total	550

Master Plan Scheme: Proposed Concept

Goals met with site concept:

BULLDOG CULTURE

- Pride in School – School is more outward facing and allows stronger connection to sporting events and Theater, provides central hub
- Separates Middle School from High School to give its own identity and clear entry off of Liberty for Visitors

COMMUNITY

- Parking brought to the east of the site for students
- Commons provides space for students to gather
- “Core” is at the center of the site with pedestrian zone

FUNCTIONAL & ADAPTABLE

- Transportation system for students and public separated
- Connects east side to site through internal pedestrian routes
- Gets more parking off of the streets
- Service utilizes existing service location

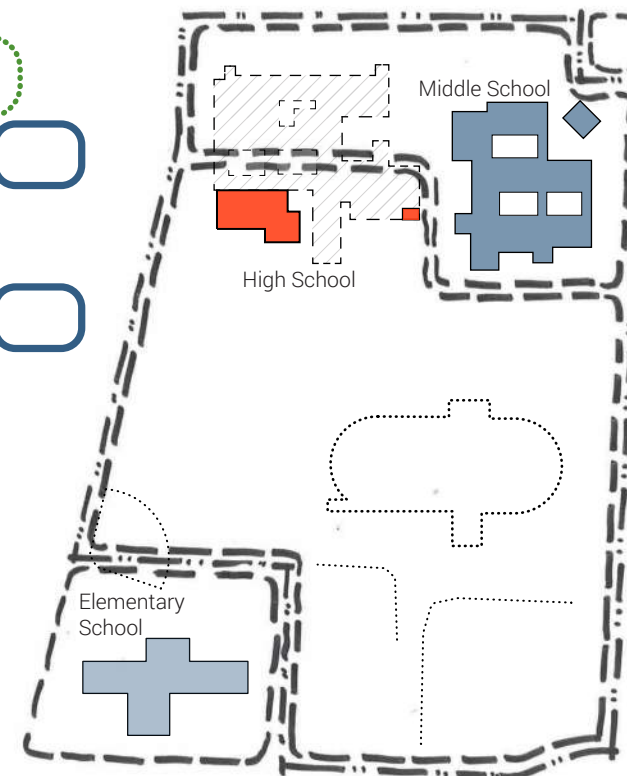

TRANSPARENCY

- Transparency through site from Elm to Liberty

Entry Diagram

Site Use

Pros

- Creates a single entry point - Secure Entry
- Provides views into the site from the Commons
- Memorial fields separated from High School Fields
- Provides one entry for public and students
- Separates Student vehicular traffic from Bus traffic and away from elementary school
- Provides pedestrian path from entry to athletic fields

Cons

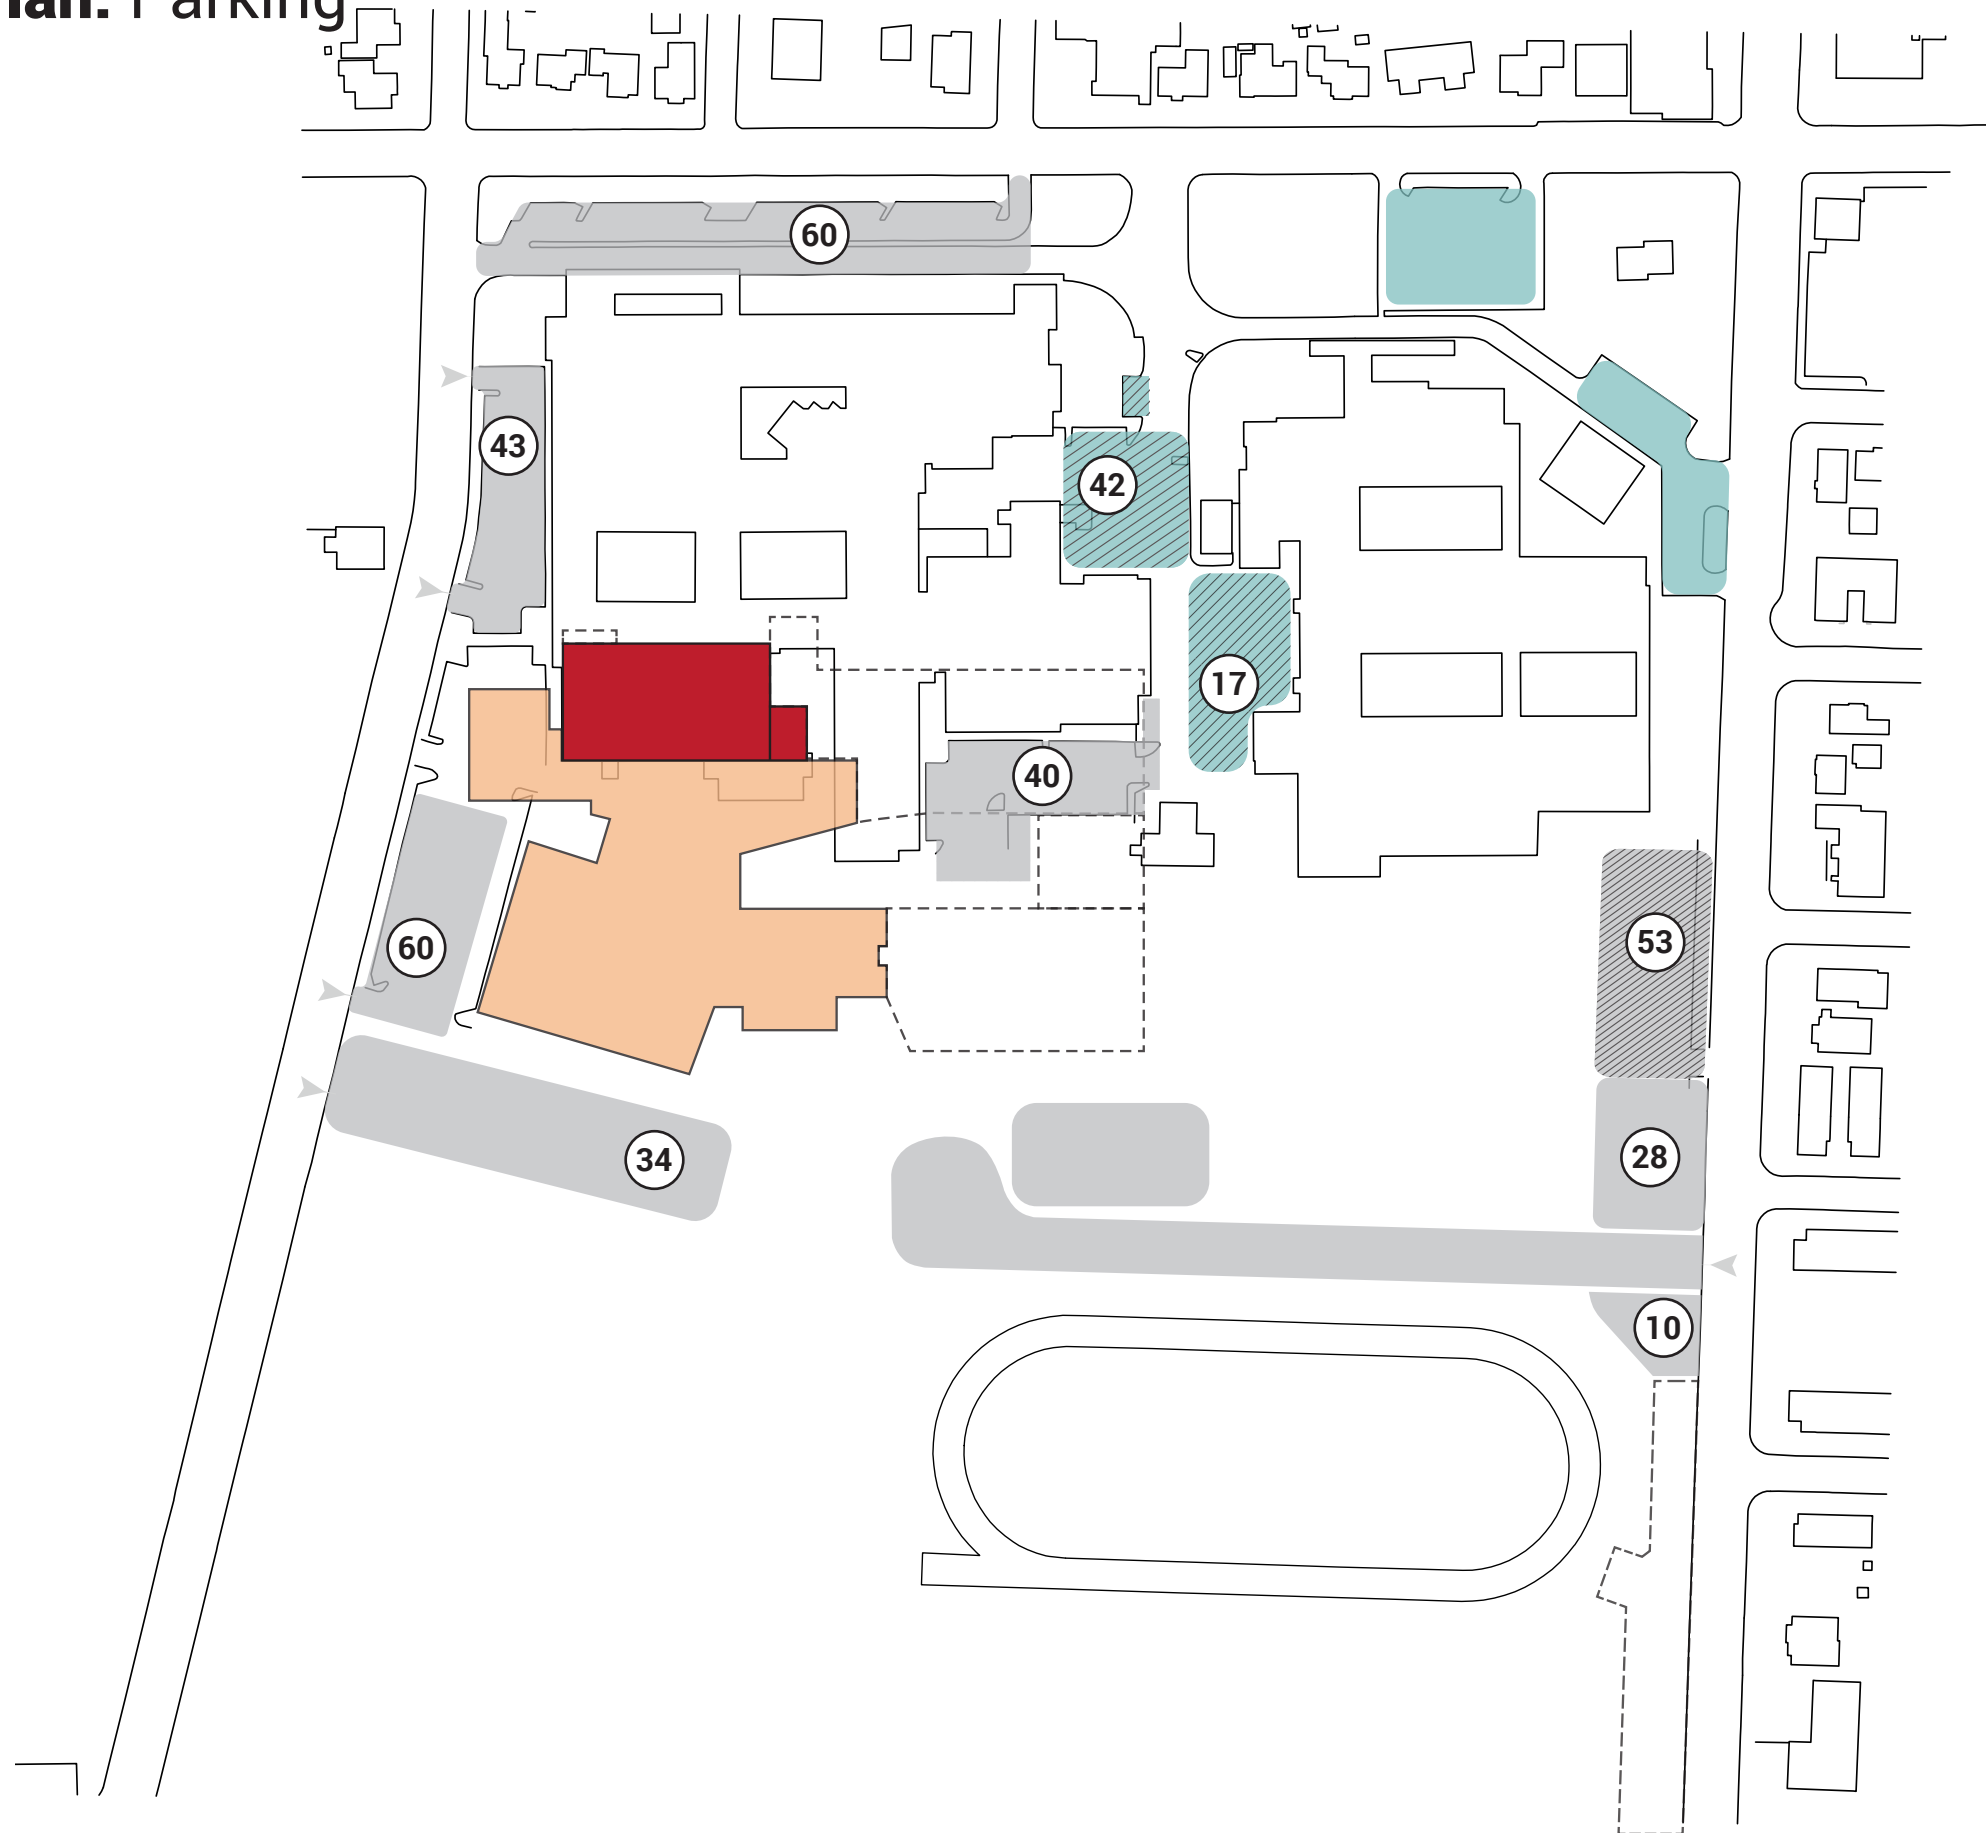

- Face of school is more internal to site
- Middle school fields not adjacent to high school fields for shared resources
- Creates a front and rear condition along Queen

Master Plan: Overall Site Plan

Master Plan: Parking

PARKING LEGEND

- MMS Parking (not counted)
- MMS Parking from WAHS (59)
- WAHS Parking
- WAHS Parking from MMS (53)

SUMMARY

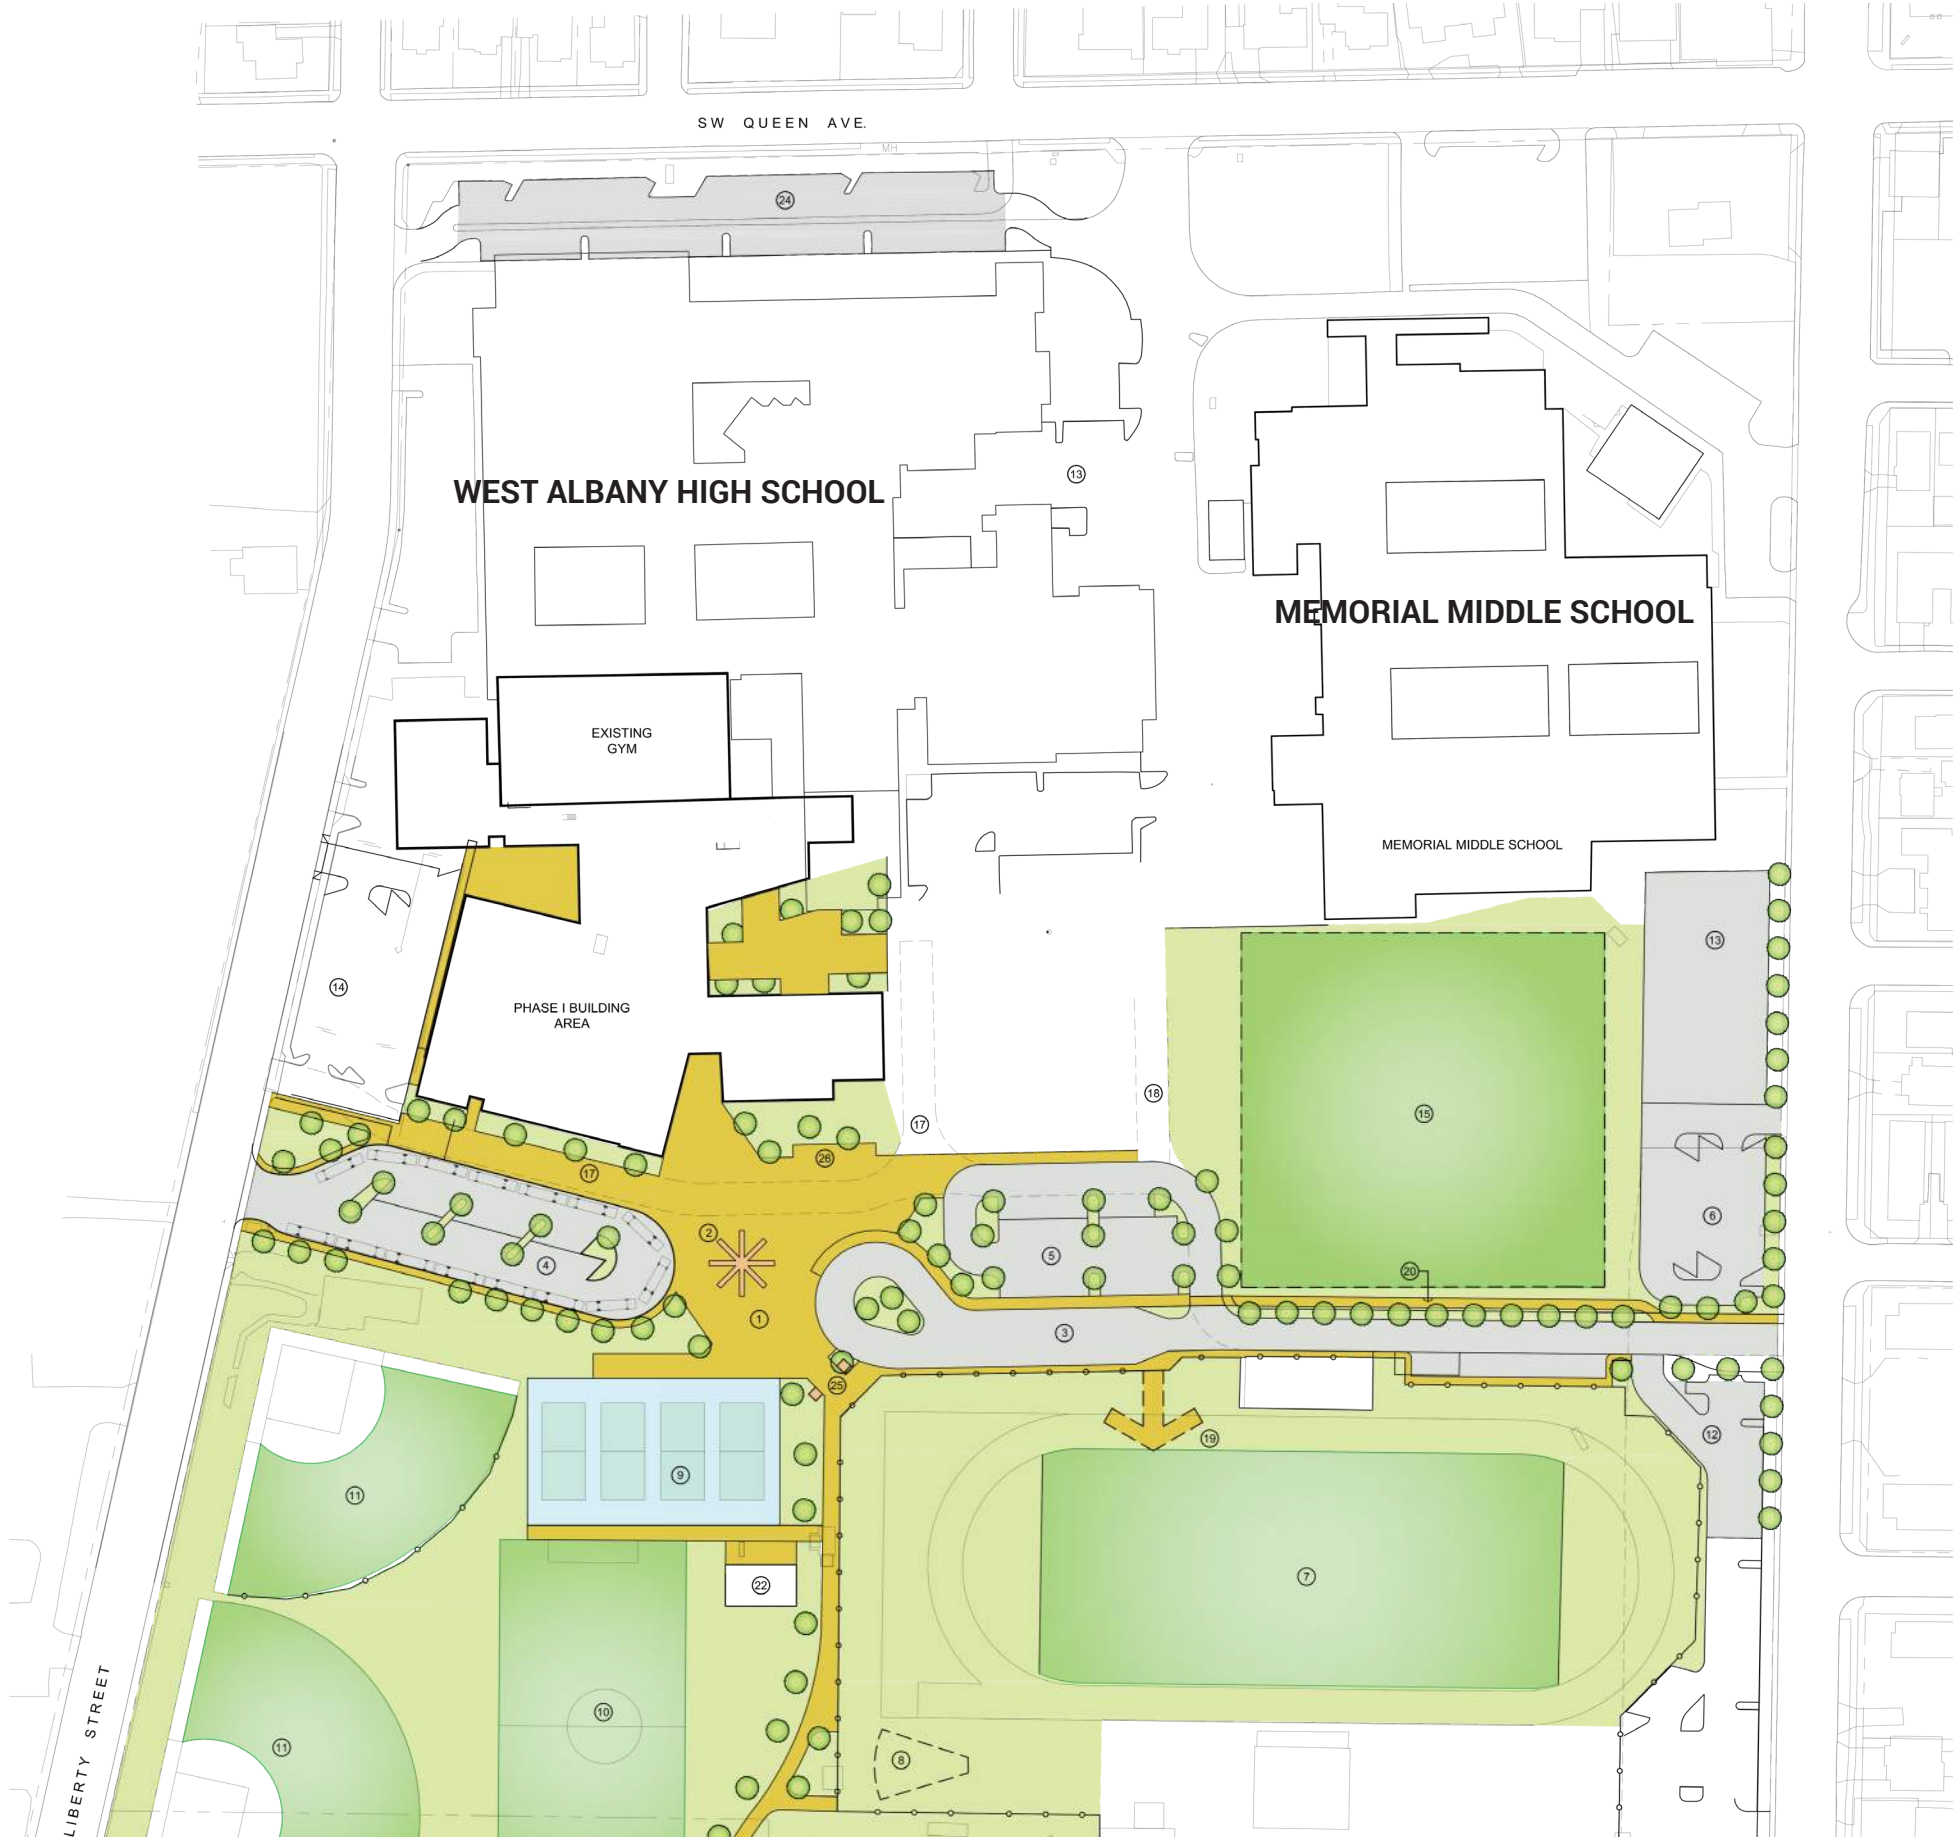

EXISTING WAHS PARKING	(421)
WAHS MIN TARGET PARKING, PHASE I, ON-SITE	(415)
PARKING REMOVED DURING CONSTRUCTION	(-107)
NEW PARKING CREATED OR TRANSFERRED	(130)
PROPOSED PARKING	(480)

Option A: Health Occ. & Gym

- Potential Event Gym Phase II
- Auxiliary Gym Phase I
- Multi-Centralized Commons
- Health Occupation CTE spaces

Phase I Option A: Site Plan

Phase I Option A: Ground Level

Program

- Administration
- Art/Leadership
- Business
- Food Service
- Performing Arts/Theater
- Phys. Ed/Health
- Infrastructure

Phase I Option A: Upper Level

Program

- Art/Leadership
- Business
- Info. Technology Labs
- Performing Arts/Theater Infrastructure

Phase II Option A: Site Plan

Option B: Health Occ. Support

- Event Gym Phase II
- Renovate existing Gym for Auxiliary Gym
- Centralized Commons
- Health Occupation CTE spaces

Phase I Option B: Site Plan

Phase I Option B: Ground Level

Program

- Administration
- Art/Leadership
- Business
- Food Service
- Performing Arts/Theater
- Phys. Ed/Health
- Infrastructure

Phase II Option B: Upper Level

Program

- Art/Leadership
- Business
- Info. Technology Labs
- Performing Arts/Theater
- Phys. Ed/Health
- Infrastructure

Phase II Option B: Site Plan

Bond Plan & Current Plan: Program Comparison

New FTE Instruction Spaces	*Current Adjusted Program	NET Square Footage			
		Bond Plan	Phase I	Option A	Option B
1	Auditorium & Support	13,370	14,670	14,670	14,670
1	Drama Classroom (1)	1,200	1,200	1,200	1,200
	Music				
1	Band	2,200	2,200	2,200	2,200

1	Stagecraft	1,200	1,500	1,500	1,500
2	Health Occupations	1,800	0	1,800	1,800
2	Multi-Purpose CTE Space (Gymnasium)	0	0	8,100	0
1	Wrestling	0	0	0	3,840
	Cardio/Weight Room	0	0	0	3,000
1	Culinary (renovate existing kitchen)	0	0	0	0
1	Wood working (remains in same location)	0	0	0	0
1	Business Lab	1,200	1,200	1,200	1,200
	Fine Arts (2D)	1,350	1,400	1,400	1,400
	Fine Arts (3D)	1,350	2,000	2,000	2,000
1	General Education Classrooms (5 @ 960 SF)	4,800	0	0	0
	Additional Labs				
1	Art - Fine Arts Pottery (and Kiln room)		1,800	1,800	1,800
1	Business - Student Store / Storage		825	825	825
1	Business - Computer Lab/Classroom			1,200	1,200
	Restrooms and Central Plant		4,000	4,000	4,000
Sub-Total NEW		49,570	54,550	68,690	67,690
Net to Gross .47 Multiplier*		<u>23,235</u>	<u>25,544</u>	<u>32,284</u>	<u>31,814</u>
TOTAL NEW (20 instructional spaces)		72,805	79,894	100,974	99,504
Renovated Labs / Gen Ed Classrooms (7-10 instructional spaces)		13,000	13,000	14,000	17,000
TOTAL INVESTMENT (SF)		85,805	92,984	114,974	116,504
Percentage of Phase I to Full Build-Out (Estimated at 205,112 SF)		35.5%	39.0%	49.2%	48.5%

*Infrastructure includes corridors, elevators, structure, walls, restrooms, janitorial spaces and utility spaces. Percentage was reduced to reflect current planning standards.

Phase I Adjusted Program

- **Auditorium** support spaces were increased to align with required spaces. Teaching space was reduced to one from three based on interviews and tours of other spaces that were subdivided. This also allows the theater to be used by all schools as a district wide amenity.
- **Band and Choir** - Associated storage and work rooms were increased to account for existing storage needs and industry standard sizes. The existing Music Department has over 1500 sf of storage that was not included in the bond plan. The choir room was right-sized to allow for office and workroom spaces, while two ensemble practice rooms were added to accommodate larger practice group.
- **Administration** was increased to include all counseling services to move to the new phase.
- **Stage Craft** was increased to reflect industry standards and functions as a CTE space.
- **Fine Arts** - 3D Studio was increased to get closer to existing size space. This classroom is a multipurpose classroom with space for small metal CTE space as well. The existing arts program consists of three classrooms. The bond plan indicated two. The Phase I plan added the full Art department and the related storage and kiln rooms. The third classroom took the place of one General Ed classroom indicated in the Bond Plan.
- **Business** - The Bond Plan indicated one Business Lab and a Graphic Design/Print Shop. These spaces are in the current plan. Finally, a student store was added which will be run by the Business department and will be an additional CTE space for sales experience.
- A **Maker Lab** was added to allow for light manufacturing CTE space. This will be an all school resource space that teachers can book for project specific hands-on fabrication.

Bond Premium

Phase I Option A

- **Business** - To bring over a full Business department, two other Business labs are being added.
- **Health Occupation** - This was part of the original Bond Planning discussions as a desired CTE element with two Health Occupation classrooms and a multipurpose Gymnasium

Phase I Option B

- **Business** - To bring over a full Business department, two other Business labs are being added.
- **Health Occupation** - This was part of the original Bond Planning discussions as a desired CTE element with two Health Occupation classrooms
- **Athletics** - Move Wrestling and Cardio/Weight Room

Area Plan: Existing Uses

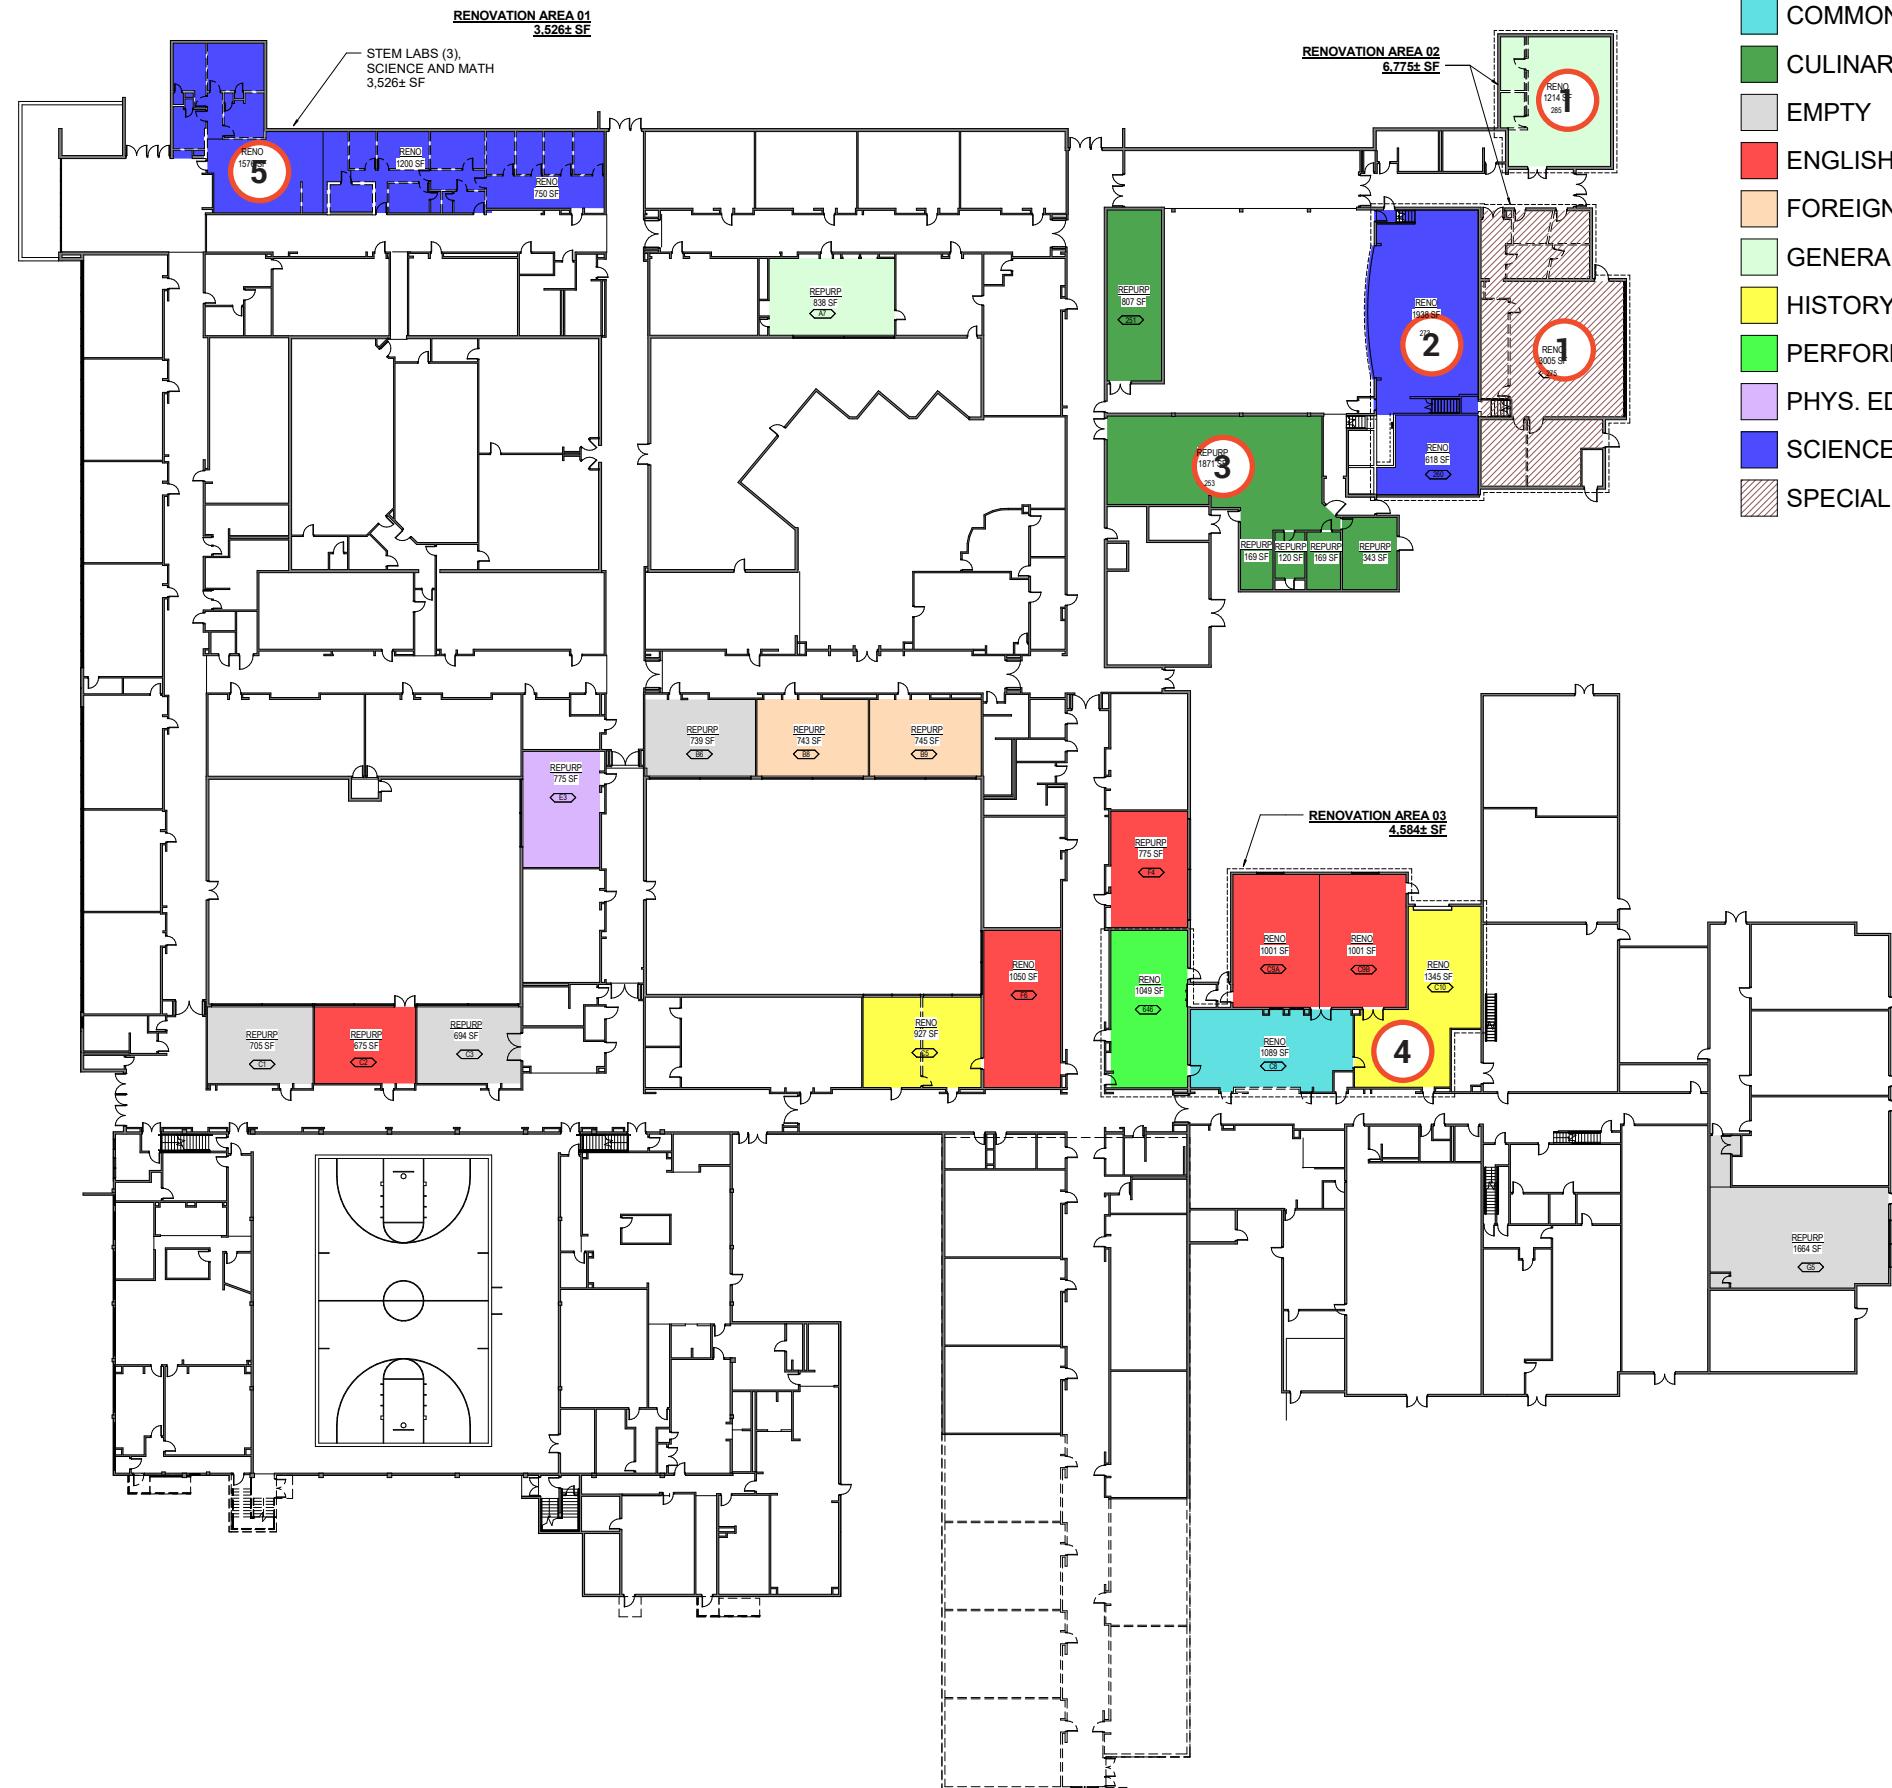

- ADMINISTRATION
- ART/LEADERSHIP
- BUSINESS
- CULINARY
- ENGLISH/LANGUAGE ARTS
- FOOD SERVICE
- FOREIGN LANGUAGE
- GENERAL EDUCATION
- HISTORY/SOCIAL SCIENCES
- MATH
- MEDIA CENTER/LIBRARY
- PERFORMING ARTS/THEATER
- PHYS. ED/HEALTH
- SCIENCE
- SPECIAL ED
- STUDENT SERVICES
- TECHNOLOGY/VOCATIONAL ART

Renovated Spaces

- 1** General Education and Special Education
These spaces will be renovated to be a general education classroom and a special education classroom
- 2** Active Learning
The existing stage and adjacent storage may be re-purposed to support robotics and other applied learning activities.
- 3** Culinary Program
The existing kitchen will be renovated to provide a culinary program. This will also allow the existing Food Lab to be maintained resulting in one additional FTE instruction Space.
- 4** Language Arts and Leadership
Three classrooms will be renovated to be Language Arts classroom and a Leadership classroom with a collaboration space.
- 5** Multipurpose Classrooms
This existing Administration space will add two multipurpose classrooms for Math and Science. This will result in two added FTE instruction Spaces

***All other colored areas are re-purposed classrooms**
